

ASSOCIAZIONE ITALIANA CHIROPATICI
ASSOCIATION OF ITALIAN CHIROPRACTORS

The Association of Italian Chiropractors is proud to present

LUCA VANNETIELLO, D.C., M.D.
CHIROPRACTIC IN NEURODEVELOPMENT

AMAYA ALONSO, D.C.
CRANIAL KEYS FOR THE CHIROPRACTOR

OCTOBER 28th-29th 2023
ROME, SHANGRI - LA HOTEL

EAC / CPD ACCREDITED

Dr Luca Vannetiello Medical doctor (ITA, 2000) and chiropractor (USA, 2003), Dr Vannetiello has worked for the last 15+ years in his hometown Nola (Naples). From 2012 he has been following a Functional Neurology graduate studies program at the Carrick Institute. Thanks to his Functional Neurology studies Dr Vannetiello regularly deals with developmental issues, including autism spectrum conditions. In 2017 he published a case report of a recovered child.

Dr Amaya Alonso graduated from Life Chiropractic College West 2004. She is the founder and owner of Quirosun Chiropractic Center, a beacon for Family health in the south of Spain.

Amaya has followed: Certificate program with ICPA, Academy for functional pediatrics, peak potential institute, SOT, and many more seminars. She keeps learning from the best teachers in Chiropractic and family health, with special focus on the Cranium. She is a BGI Master and was part of the BGI staff with Sue Brown (DC). She has a Postgraduate degree in Odontology and Posturology in UCAM (universidad de Murcia). Dr. Alonso has taught the pediatrics module for the Master of Chiropractic in the Madrid College of Chiropractic for many years. She frequently teaches seminars to chiropractors and chiropractic students in Spain focusing on pregnancy and pediatrics chiropractic.

She is involved in the Pregnancy and Neonatal health group in Vithas Malaga Hospital for more than 15 years.

Amaya is a clinical expert in Breast-feeding and Tongue tie. She works with "Anquiloglosia Málaga", a group of the highest health care specialists in the area (pediatric surgeon, midwife, speech therapists, etc...) that deals with breastfeeding difficulties.

She applied her knowledge serving to many thousands of people around the world in her more than 20 mission trips in India, Brasil, El Salvador, Colombia, etc...

Amaya is the mother of two wonderful children (3 and 5) and that has taught her more knowledge than any other experience in her life.

Summary - Timetable

Saturday, October 28th - Dr. LUCA VANNETIELLO

8:30-13:00 Neurodevelopment is hierarchical. Complex cognitive and neurological functions need, in order to function properly, earlier hierarchical phases to have structured adequately. Otherwise, when disrupted, the complexity of human expression will be less efficacious.
For academic purposes only, the neurodevelopment is explained through mainly 2 streams that are interconnected.
1- Neurological development: referring to pure neurological functions (Sensory-Motor)
2- Cognitive development: referring to emotional-cognitive expression.
During the webinar the attendees will see which are the primitive reflexes and how to deal with those that are still present when they shouldn't be.
During the seminar Dr Vannetiello will focus on the chiropractic contribution to the management of babies and children with neurodevelopmental issues. He's going to teach how to be effective working in a multidisciplinary team that also helps parents to deal with their babies.
The seminar will focus on case management from the chiropractors' perspective: how to work on the neurology and at the same time with the cognitive development of the baby. That'll maximize the results of the chiropractic adjustment.
The attendees will learn, from Dr. Vannetiello's experience, key concepts and strategic clinical applications of neuroscience to help patients in different phases of neurodevelopment.

SATURDAY OCTOBER 28th - h. 15.00 - AIC GENERAL ASSEMBLY - only for AIC members

Sunday, October 29th - Dr. AMAYA ALONSO

09.00-18:15 The most important things chiropractors need to know about the cranium. Understand cranial dynamics and its influence on the spine at all ages.
Dr Amaya Alonso will take us on a journey of exploration of the cranium starting from a general review of the anatomy. The seminar will then focus on the meningeal system and the basic movements of the CSF. All that is going to serve us to understand how the cranium development affects the distortions of the spine through the Dural attachments.
Once we covered the origin/cause of the issue, Dr Amaya is sharing with us the most important and basic corrections and adjustments we can apply to the cranium and the rest of the body to restore its proper function.
The attendees will learn how to assess and adjust, from a chiropractor's perspective, the most important cranial dysfunctions in the baby and in the adult.
Other topics connected to the cranial dynamics covered in the seminar are dental work and the tongue.
The seminar is going to be very practical, everything that is taught can be applied straight away in practice.

THE SEMINAR IS ONLY FOR CHIROPRACTORS AND CHIROPRACTIC STUDENTS
