

ASSOCIAZIONE ITALIANA CHIROPATICI
ASSOCIATION OF ITALIAN CHIROPRACTORS

The Association of Italian Chiropractors is proud to present

DANIEL MURPHY, D.C.

MAY 25th-26th 2024

MILAN, AC HOTEL MARRIOTT

SUBLUXATION NEUROLOGY

EAC / CPD ACCREDITED

Daniel Murphy, DC

Dr. Daniel Murphy is one of the most knowledgeable and respected speakers and educators in the chiropractic profession.

Dr. Murphy, a 1978 graduate of Western States Chiropractic College, began clinical practice in 1978 and, not long after, became a part-time faculty member at Life Chiropractic College West – a position that he still maintains to this day.

Dr. Murphy's post at Life has, perhaps, done more to shape his outstanding career than any other. "In reality, I do not know very much about anything, but I know a little about many different topics."

Dr. Murphy goes on to say, "Consequently, my value to our profession is that of an idea integrator, a dot connector. I want to improve my understanding of how chiropractic works and what we can do to make chiropractic more effective. I want to change the health attitude of the world. I will not retire."

COURSE DESCRIPTION

- Hour #1* Learn the neurology of pain perception.
- Hour #2* Learn three types of pain and their clinical differences in terms of chiropractic management.
- Hour #3* Distinguish between the clinical management of compressive neuropathology v. supersensitivity nerve interference.
- Hour #4* Discuss the integrated physiology between inflammation, fibrosis, the Gate Theory, and chiropractic adjusting.
- Hour #5* Complete an interactive clinical neuroanatomy of chronic spine pain, including: receptors, synapses, cord pathways, brain representation, and how they are influenced by spinal adjusting.
- Hour #6* Complete an interactive exercise of spinal mechanoreceptor driven vestibular nuclei controls of somatic function and visceral function.
- Hour #7* Complete an upper cervical - trigeminal cervical nucleus integrative model for chiropractic spinal adjusting.
- Hour #8* Integrate the clinical relationships between chronic spine pain and spinal mechanoreception, including: constant v. non-constant thalamic summation/integration; ascending inhibitory principles; descending inhibitory principles; immune system function.
- Hour #9* Discuss the clinical relevance of receptor driven neuroplasticity, synaptogenesis, and transneuronal degeneration.
- Hour #10* Discuss the concept of spinal mechanoreceptor driven hypothalamic controls of visceral function.
- Hour #11* Discuss the relationship between mechanoreceptors, the sympathetic nervous system, and neuroimmunology.
- Hour #12* Discuss the relationships between the nucleus tractus solitarius and the dorsal motor nucleus of the vagus nerve.

THE SEMINAR IS ONLY FOR CHIROPRACTORS AND CHIROPRACTIC STUDENTS
